Total spending since 1999 has more than doubled (up 128%) versus an increase in the Consumer Price Index of only 52%, so spending has increased 2.5x more than inflation (128/52). This spending growth was driven in the first ten years by 11% compound annual growth (CAG) in Debt Service (driven in turn mostly by the need to build and expand schools), and by 7.1% CAG in the BOE budget (driven in turn by 2.7% CAG in the number of pupils and 4.3% CAG in the cost per pupil, versus a CPI inflation rate of 2.6% over the same period). In the last ten years, a major budget driver has been Retiree Costs, which for the Town (not including the BOE) almost quadrupled from \$4.4 million in FY09 to \$17.3 million. Meanwhile, the annual Tax Levy has increased even more (up 150%) as non-tax revenues (e.g., federal and state aid, fees) rose from \$18 million in FY99 to a peak of \$29 million in FY05, and then declined to to \$16.5 million. Thus, the Tax Levy has increased 2.9x more than inflation since FY99 (150/52). Pupils as a percent of Population increased from ~13.3% in FY99 to a peak of 17.2% in FY12, and has declined slightly to an estimated 16.0% in FY 19. Note that "cost per pupil" (BOE/Pupil) is understated because it does not include debt service on school buildings and other school costs that are not in its budget (e.g., nurses salaries); the actual cost/pupil in FY19 will be ~\$20,180 (\$198m/9,811).

CPI data from Bureau of Labor Statistics, Urban Wage Earners (CPI-W), 1982-84 = 100, for the third quarter of the prior year. NB: Numbers in the Grand List, Tax Base and Tax Rate columns in *Italics* are years in which revaluations took effect. CT DPI/Capita = Connecticut Disposable Personal Income per capita from the Bureau of Economic Analysis, U.S. Department of Commerce, SA51.

Population data from CT Department of Public Health, but the implied number of permanent residents since 2009 is inflated by a change in the 2010 Census rules that increased the proportion of Fairfield's 13,000+ college students who are included in the total. Debt figures are the total of current and non-current Bonds and Bond Anticipation Notes outstanding at the end of each fiscal year per the CAFR. 5/28/2013
